Since the debut of AutoCAD, it has been the leading software application for the design, drafting, and construction of three-dimensional objects, such as buildings and mechanical or electrical systems. Today, AutoCAD is one of the most widely used CAD applications on the planet, with a reported five million license sales in 2010. AutoCAD is currently priced at US\$49.99 for the desktop version, US\$49.99 for the web-based version, and US\$199.99 for the AutoCAD 365 subscription service. AutoCAD software can also be purchased in volume licensing and cloud computing formats. AutoCAD is used by over 35% of Fortune 500 companies, according to a 2011 report from Allianz Risk Solutions. In 2012, Autodesk received the "Best of Innovation" award at the Canadian Design Awards.

Interaction with other products

Most of the CAD products can connect to other Autodesk products through application programming interfaces (APIs) such as AutoCAD Exchange, Autodesk Exchange, iView, DWG Viewer, VectorWorks, PeopleSoft, SIMULIA, Inventor, Pro/ENGINEER, Arena, Revit, PowerBuilder, Maya and Sibelius. Some of these are available from the Autodesk Exchange Apps. Autodesk also offers API support through its acad.com website.

Dependency on features that are not within the scope of the CAD software

AutoCAD is very fast when initially started up. The startup process can require several minutes to complete. Once AutoCAD is started up, the execution speed can be very poor. The algorithms of the AutoCAD are complicated and can be difficult to understand and optimize. In particular the rendering algorithms for rendering with textures are complex and not the kind of thing that can easily be optimized in a simple way. The lack of documentation or implementation details is a problem that can be hard to resolve. Other features that are not in the scope of the product (such as drafting) are never truly optimized.

Computer Systems Compatibility

On January 21, 2013, Autodesk announced that it would no longer develop Windows Vista and Windows 7 drivers for AutoCAD, citing the end of support on those operating systems. The last supported operating system for AutoCAD 2009, AutoCAD 2010, AutoCAD 2011 and AutoCAD LT 2011 is Windows 7 SP1. Support for Windows 7, Windows 8 and Windows 8.1 is limited. Most functionality is available only with AutoCAD LT 2011 and later. A number of newer features are not available on Windows Vista or Windows 7. The only supported operating systems for AutoCAD LT 2016 are Windows 8, Windows 8.1, Windows 10, Windows Server 2012 R2 and Windows Server 2012. Support for Windows XP is limited. New features and functionality are not available on older operating systems, although there is a limited capability to update older systems with newer software. The development of new product support for Mac OS X remains under evaluation, although the new operating system has been supported with a number of releases. The PC licence is not compatible with the Mac licence. The Mac licence is designed to be used on multiple computers as a single licence. Multiple instances of the same PC licence can ca3bfb1094
